

2021 Kathleen L. Miller Fellow

Rita McCall, PhD
Candidate, Microbiology, Cox Lab

Rita McCall is a Microbiology PhD Candidate and NSF Graduate Research Fellow in the Cox Lab at UC Berkeley. She received a B.A. in Biology with Honors from Grinnell College in Iowa. After graduating Rita completed a two year Postbaccalaureate Fellowship at the NIH where she studied the genetics of anthrax toxin production. For her thesis she is investigating novel aspects of the host response to *Mycobacterium tuberculosis* infection using reverse genetics and proximity based labeling approaches
